THE PYRAMEX PROMISE

At Pyramex, our promise to our customer is to provide the best possible products, the best possible service, and most importantly, an attitude of making our customer's lives easier on a day-to-day basis. Our values challenge us toward a commitment to truth and to deliver what we promise.

Pyramex has been around for over two decades, and while a lot has changed for the company— we have grown, innovated, relocated, and improved— so much has remained the same. Our customers are and always have been our number one priority. We are endlessly looking to them for feedback, for direction, for inspiration...Why? Because they're the ones who are going to work every day wearing our products. They're who Pyramex makes products for. We value every conversation with our distributors, rep groups, and end-users, because each interaction allows us to grow and become better. We like to say that when you contact Pyramex, you are contacting a person and not a machine. But we forget one huge detail; you talk not only to a person, but a person who values you for calling, chatting, or emailing us. Our partnerships with each of our customers is our highest priority.

Our products are a direct reflection of our tirelessness to bring you the best. Many hours are spent researching, designing, and perfecting each product to bring you exactly what you need. We test them to the highest safety standards and make them with the most durable, innovative, and appropriate materials for their designated applications. As you look through this 2020 catalog, we encourage you to take note of each product's safety information, specific features, and standards that have been curated for the sole purpose of helping you to understand what it is you are buying. It is important to us to keep you informed, and for the catalog you hold in your hands to not just be a catalog, but a tool filled with useful information.

MARKETING AT YOUR FINGERTIPS

Pyramex creates the marketing tools you require to be knowledgeable about our offerings. By using these tools, you can provide the necessary solutions for your customers. Be sure to ask your sales representative for any of these resources.

11 x 17"

Posters available: gloves, workwear, eyewear, headgear, welding, hearing, Venture Gear Tactical®, and Venture Gear®

18 x 24"

WHY YOU WEAR POSTER SERIES

We created the Why You Wear poster series to give you facts of why PPE is important and why we do what we do. There is a large poster that covers all product lines. There are also smaller product line posters that are more specific to that product. Request posters from your sales representative.

PYRAMEX WEBSITE

Stay up to date on all things Pyramex by using our website as a tool. There, you will be able to browse our line – including our closeout and new items. You are able to view images, product sheets, catalogs, videos, etc. You can even Live Chat with us to get the answers you need. To utilize everything our website has to offer, visit PyramexSafety.com.

BOX.COM

Need to get our marketing materials anytime? Then you need to be a part of our box.com group. Simply ask your sales representative for access and we will send you an invite. Once you have created a free box.com account, you will be able to view and download all our images, flyers, catalogs, brochures, guidelines etc.

PYRAMEX BLOG

The Pyramex blog is another great resource. We try and give you the knowledge you need to better understand the safety market. From learning about tips to prevent heat stress to understanding when and where to wear your hi-vis, our blog is your tool. Go to Pyramex.blog.com.

CUSTOMIZE

Imprint your logo or your customer's logo on Pyramex eyewear, earmuffs, hard hats, and workwear. In order to start the process, we only need your vectored artwork. We even offer this service for custom product flyers as well. Contact your sales representative for further details.

OFFERING A FULL LINE OF PPE

No matter what job or activity you do, Pyramex's extensive line of PPE products will protect you. We offer a broad range of gloves, workwear, eyewear, headgear, welding helmets, hearing protection, cooling products and ergonomic support. All of our products have been independently tested for various standards and certifications. Pyramex Safety Products are available for sale through authorized distributors.

Lacerations account for 63% of hand injuries. Other common injuries are crushes, detachments, punctures, and fractures.

Source: Safety and Health Council

CERTIFICATIONS

ANSI/ISEA 105-2016

ANSI/ISEA 105 standard features cut ratings that range from A1 through A9. Cut ratings are based on the grams of weight needed to cut through the material. Our ANSI cut level glove options include A1 (200-499 gm), A2 (500-999 gm), A3 (1,000-1,499 gm), A4 (1,500-2,199 gm), A5 (2,200-2,999 gm), A6 (3,000-3,999 gm) and A7 (4,000-4,999 gm). The standard also measures abrasion levels based on the number of revolutions with a specified weight that it takes to abrade the glove. Level 0 (500 gm, < 100 rev), Level 1 (500 gm, > 100 rev), Level 2 (500 gm, > 500 rev), Level 3 (500 gm, > 1000 rev), Level 4 (1,000 gm, > 3,000 rev), Level 5 (1,000 gm, > 10,000 rev), Level 6 (1,000 gm, > 20,000 rev). The standard also includes a performance test for puncture resistance. The test measures how the glove will resist puncture by a blunt pointed object. Higher puncture forces indicate a greater puncture resistance. Level 1 (≥ 10 n), Level 2 (≥ 20 n), Level 3 (≥ 60 n), Level 4 (≥ 100 n) and Level 5 (≥ 150 n).

ANSI/ISEA 138-2019

ANSI/ISEA 138 is a new standard to establish a minimum performance for gloves designed to protect the back of hand from impact forces. The standard features three performance levels with Level 3 providing the most impact protection. Level 1 (≤ 9 kN), Level 2 (≤ 6.5 kN), and Level 3 (≤ 4 kN). The less force that is transmitted to the wearer's hand earns a higher performance level indicating a greater degree of protection.

CE EN388:2003

CE EN388 standard features abrasion, cut, tear and puncture ratings. Abrasion ratings are based on the number of cycles required to abrade through the sample glove. Cut ratings are based on the number of cycles required to cut through the sample at a constant speed. Tear ratings are based on the amount of force required to tear the sample. Puncture ratings are based on the amount of force required to pierce the sample with a standard-sized point.

i Pyramex gloves that comply with the EN388:2003 standard can still be sold. As we move forward, we will start testing to the current 2016 standard.

CE EN388:2016

The TDM-100 Test is an additional cut test. This test is done after the first 60 rotations of the Coup test to assess the durability of a glove rating more accurately. Levels include A (200-508 grams), B (509-1019 grams), C (1020-1529 grams), D (1530-2242 grams), E (2243-3058 grams) and F (3059+ grams). The new standard also features an Impact Protection Test. This test is only for gloves that are intended to provide impact protection. The impact rating is based on the amount of impact energy (5 joules) dropped on the surface of the glove. Ratings include P (pass), F (fail), and X (not tested).

CE EN 420:2003 + A1:2009

i EN 420:2003 + A1:2009: Protective Gloves – General requirements and test methods.

i Product markings may vary. Refer to the product sheet for the most current test report results.

BASIC GLOVE KNOWLEDGE

LEATHER GLOVES

GLOVE PATTERNS

Clute Cut
Palms are seam-free with stitching on the back of the hands + Provides good comfort and hand protection

Gunn Cut
Seamless back with a seam at the base of the two middle fingers at the natural crease in the hand + Most often used pattern in work gloves

Reversible
Thumb is positioned on the side of the hand so that it can be worn on either hand + Good for situations where palm or thumb receive a lot of wear

THUMB TYPES

Straight Thumb
Thumb lies straight with index finger + Most common to fabric and leather gloves

Wing Thumb
Thumb that is angled diagonally across the palm + Improved comfort

Keystone Thumb
Inset thumb + Provides additional wear and greater comfort

CUFF STYLES

Knit
Elasticized, stitched or plain material + Provides snug fit to keep water and debris out

Slip-on
No cuff + Glove material extends over wrist area

Safety
2.5" cuff + Quickly removed in case of emergency

Gauntlet
4.5" cuff + More protection to forearm

GRAIN VS SPLIT LEATHER

Grain Leather
Taken from the outer layer of the hide + Provides products that are soft, smooth, and flexible

Split Leather
Leather that remains after the outer layer has been removed + Coarser, more resistant to abrasion, and repels water better

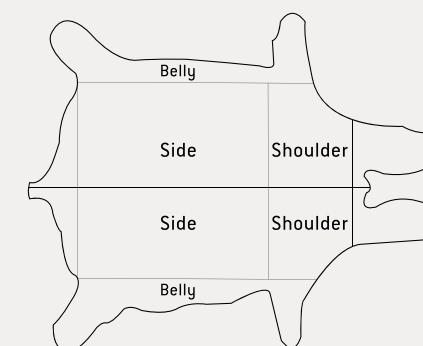

HIDE SELECTION

Side Leather
Most durable + Highest quality

Shoulder Leather
More economical than side leather + Good durability

Belly Leather
Most economical version + Least durable

LEATHER TYPES

Cowhide
Great value + Durability

Goatskin
Strong + Comfortable

Pigskin
Stays soft after getting wet + Breathable

Sheepskin
Soft + Lightweight

SIZING

WELDING

DIPPED GLOVES

COATINGS

Polyurethane
Value work glove + Low particulate shed + Touch sensitivity with dexterity

Latex
Flexibility in extreme temperatures + Tear resistant + Suited for wet and dry conditions

Nitrile
Latex alternative + Absorbs oil + Outstanding grip

GRIPS

Smooth
Great dry grip + Does not absorb liquids

Micro-Foam
Excellent dry grip + Touch sensitivity + Channels away liquids

Crinkle
Outstanding grip in wet/dry conditions + Channels away liquids

Sandy
Enhances grip in wet/harsh conditions

Pattern
Reinforces grip performance + Durable

LINER

Nylon
Abrasion resistant + Highly absorbent + Touch sensitivity with dexterity

Polyester
Resistant to shrinking and stretching + Quick drying

HPPE
Higher performance polyethylene + Cut resistant + Maximum strength + Minimum weight

GAUGE

The gauge of the liner is the number of rows of stitches per inch. A glove with a higher gauge will fit better and have more dexterity + tactile feel. Our liner gauge options include 10g, 13g, 15g and 18g.

SIZING

The color of the binding around the cuff indicates the glove size.

CERTIFICATIONS

ANSI/ISEA 107-2015
Cert. Mod. - CAN/CSA Z96-15

ANSI/ISEA 107-2015

Type R

Type R provides daytime and nighttime visual enhancement for workers in occupational environments, which include exposure to traffic from public access rights-of-way, roadway temporary traffic control (TTC) zones, or work vehicles and construction equipment within a roadway TTC zone.

Type O

Type O provides moderate visibility, ideal for off-road workers.

Class 1

Performance Class 1 offers low risk workers with good visibility. Class 1 is ideal for jobs in areas where traffic is traveling under 25 mph or where the work site is a safe distance from roadways.

Class 2

Performance Class 2 uses additional high-visibility materials, which allow design opportunities to define the human form more effectively. Compared to Performance Class 1, Class 2 high-visibility safety apparel (HVSA) has the potential to provide detection and identification for longer distances.

Class 3

Performance Class 3 can offer greater visibility through a full range of body movements in both complex and non-complex backgrounds by having retro-reflective and combined performance materials on sleeves.

Class E

Class E high-visibility garments do not meet ANSI safety requirements when worn alone, but when worn with a Class 2 or Class 3 garment, the overall ensemble is classified as Class 3.

CAN/CSA Z96-15

Level 2

Level 2 is the highest retro-reflective performance material and is visible under dark conditions from a great distance. Retro-reflective material also reflects light produced by the headlights of oncoming traffic back to the vehicle operator.

Class 1

Performance Class 1 offers good visibility with the lowest recognized coverage. Class 1 is ideal for jobs on or in parking areas, warehouses, sidewalks, shipping or receiving operations, etc.

Class 2

Performance Class 2 provides moderate body coverage and superior visibility. To comply with CSA standard, apparel has to fully cover the upper torso (front, back, sides and over the shoulders) with the reflective striping composed of retro-reflective or combined performance materials. X-back is used to distinguish whether a worker is facing toward or facing away from a hazard. X-back configuration is mandatory in Canada, but can be used for ANSI apparel.

Sources: ISEA International Safety Equipment Association & CSA Group

SELF-EXTINGUISHING

Self-extinguishing high-visibility garments are tested using a small scale vertical flame, and are coated and or comprised of material that is designed to suppress flames. These items are NOT flame resistant.

VISIBILITY IS KEY

According to the Federal Highway Administration, in 2013 a fatality occurred in workzone crashes every 15 hours.

FEATURES

SELECTION CHART

RVZ2410 • S – 5XL
RVZ2420 • S – 5XL

LIME VS. ORANGE

One common question we are often asked is what the difference is between high-visibility lime and high-visibility orange material, if any. ANSI considers both among the approved colors for high-visibility workwear in all classes. The main difference between the two comes when taking the complexity of the background of the wearer into consideration. High-visibility lime is often perceived as brighter, making it ideal for urban environments where it stands out against concrete or other gray backgrounds. High-visibility orange is commonly used for road work. It mimics the same orange used in recognizable traffic cones and road construction signs. It also stands out among the green in heavily foliage areas, making it perfect for hunters or outdoor enthusiasts.

SINGLE VS. CONTRASTING TAPE

Reflective tape is used on high-visibility garments to help with their overall visibility. Its purpose is to reflect light, adding greater conspicuity to any garment. The more tape that exists against the fluorescent background, the more the garment will stand out. Contrasting tape simply allows for a hi-vis garment to stand out even more against a complex background by being an additional element likely to grab our attention.

HAVE AN EYE FOR SAFETY

Experts believe that proper eye protection could have prevented 90% of eye injuries in accidents. 1 in 10 eye injuries result in one or more days away from work.

MARKING CONFIRMATIONS

TREATMENTS

H2MAX ANTI-FOG COATING

The innovative technology behind the **H2MAX** creates a high performing, superior anti-fog coating that is durable enough to withstand repeated cleanings without losing adhesion. Not only does this premium treatment ensure maximum clarity in the most extreme temperature and humid conditions, but it also adds a layer to the lens that is abrasion and chemical resistant. The **H2MAX** anti-fog coating is made from non-hazardous environmental components. Coating resists scratching from steel wool up to 100g of weight. **H2MAX** passes ANSI Z87.1 standards, CE standards for N and K, and Canadian certification CAN/CSA Z94.3.

i H2MAX products can be cleaned with Pyramex lens cleaning towelettes. Do not use abrasive cleaning compounds, solvents, ammonia, or alkaline cleaners.

H2X ANTI-FOG COATING

H2X provides anti-fog, anti-scratch, and anti-static protection. Even after repeated cleanings, **H2X** will continue to be effective because the coating is bonded to the lenses. The **H2X** anti-fog coating is made from non-hazardous environmental components. Coating is waterproof with excellent scratch resistance. **H2X** passes ANSI Z87.1 standards and Canadian certification CAN/CSA Z94.3.

TECHNOLOGY

POLYCARBONATE

All Pyramex safety eyewear utilize polycarbonate lenses. Polycarbonate lenses are up to 10 times more impact-resistant than plastic or glass lenses and provide 99% protection from the sun's harmful UV rays. They are lightweight and include a scratch-resistant coating to prevent surface scratches.

POLARIZED

Polarized lenses eliminate glare, increase visual clarity and enhance contrast all while reducing eye strain. We offer polarized options in forest gray, sky red mirror, green mirror, blue mirror and gray.

PHOTOCHROMIC

Photochromic lenses change from clear to dark, after exposed to direct UV light. Lenses change from dark to clear, after removed from UV light.

COLORS

VISIBLE LIGHT TRANSMISSION

When light passes through a lens, some of it is absorbed and some of it is reflected back. The amount of light that passes through is known as the visible light transmission (VLT) and is represented by a percentage. Lens colors with a higher percentage of VLT will be lighter and allow more light to pass through, while lens colors with a lower percentage of VLT will be darker, blocking more light from reaching your eyes.

94% Clear	51% I/O Mirror	20% Sun Block Bronze	11% Smoke Green Mirror
89% Amber	43% Purple Haze	18% Antique Mirror	10% Forest Gray

Mini Ztek ANSI • CE • CSA •

Mini Ztek has all the great features of Ztek in a design better suited for slimmer facial sizes

i Mini Ztek is about 6% smaller than the Ztek.

S2514S is designed for peripheral personnel and visitors who are NOT exposed to direct IR radiation.

S25ARCS is great for use under the welding helmet – allowing welder to see work clearly without suffering “welder’s flash burn” from surrounding welders.

CERTIFICATIONS

ANSI Z89.1 (hard hats)	●
ANSI Z87.1 (brackets and face shields)	●
ANSI Z87.1+ (polycarbonate face shields)	●
CE EN 397:2012 + A1:2012	●
Cert. Mod. - CAN/CSA Z94.1-15 .55 third-party certification	●

ANSI/ISEA Z89.1 & CSA Z94.1 - 2015

Type 1 – Top Impact
ANSI: Type I hard hat is designed to reduce the force of impact on top of the head.
CSA: Type I hard hat provides impact and penetration protection for the crown only.

Class E – Electrical High-Voltage / Non-Conducting
Class E hard hats are intended to protect against falling objects and reduce the risk of exposure to high-voltage electrical shocks and burns. Class E offers the highest protection with high-voltage shock and burn protection up to 20,000 volts.

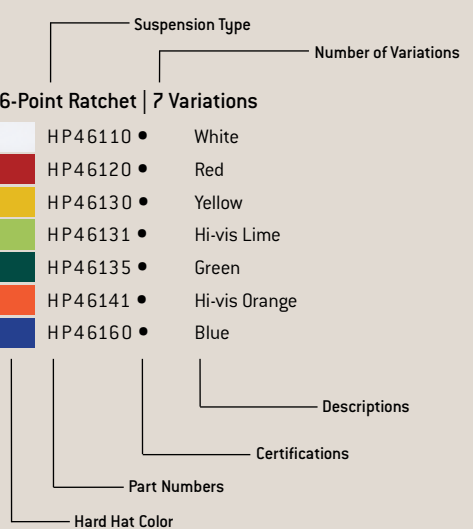

Class G – General Limited Voltage / Non-Conducting
Class G hard hats are intended to protect against falling objects and reduce the risk of exposure to low voltage electrical conductors. Class G offers impact and penetration resistance and protection from up to 2,200 volts.

Class C – Conductive
Class C hard hats are not intended to protect against electrical danger. Class C offers lightweight comfort and impact protection.

CE EN 397:2012 + A1:2012

EN 397 certifies that safety helmets are designed to offer protection from lateral impact or top impact. All helmets certified according to EN 397 must meet these requirements: shock absorption – vertical, penetration resistance, flame resistance, chin strap attachment: chin strap releases at minimum 150 N and maximum 250 N.

SELECTION CHART

HARD HATS

NEW TO THE RIDGELINE SERIES

RIDGELINE XR7®

ABS/PC material // 6-point ratchet suspension // Swinging hinge points // Soft 4-point chin strap with breakaway // Adjustable height and angle options for the suspension // Easy to grasp knob adjusts the suspension from 6½ to 8 head size // Packaged with reflective stickers // Custom imprinting available

N95 RESPIRATORS

Disposable Particulate Respirators

N95 – 95% efficient respiratory protection in non-oil areas // Ultrasonically welded straps eliminate the need for staples // Straps are latex free // Shell is durable and keeps structure under heavy humidity // Soft, smooth outer and inner layer is comfortable on the skin // Inner foam strip reduces the potential for eyewear fogging // Outer aluminum adjustable nosepiece holds shape for proper fit

N95 Particulate Respirator | 1 Variation

RM 10 One Size Fits Most

N95 Particulate Respirator with One Way Valve | 1 Variation

RM 10V One Size Fits Most

Do Not Use Against

Vapors, paint spray, oil-based aerosols, asbestos and sand blasting. Any contaminant whose concentration is unknown, or immediately dangerous to life. Concentrations of dust and mists which exceed the maximum use of concentration or 10 times contaminant's permissible exposure limit established by OSHA.

Use Against

NIOSH approved for protection against particulate aerosols free of oils. Pyramex recommends this respirator for use against particulates containing materials such as flour, iron ore, coal and minerals.

Disposable Respirators meet the NIOSH standard for N95 particulate respirators.

i N95 Respirator retail packaged products on page 143.

BALACLAVAS

BL1 Series NON-RATED

SE Balaclava can be worn in a variety of ways from face mask to neck gaiter // Mesh breathing panels increase airflow while minimizing condensation on your eyewear // Self-extinguishing thermal fleece and mesh material

2 Variations

- BL 111 Black One Size Fits Most
- BL 140 Hi-vis Orange One Size Fits Most

i BL1 series has been third party tested and can be worn under ANSI/ISEA compliant Pyramex hard hats (except SL Sleek Shell series).

AUTO-DARKENING HELMETS 100 - 101

ACCESSORIES 102

PASSIVE HELMET 102

IR FILTER PROTECTION 103 - 104

SPARK AN INTEREST

32 feet is the minimum distance you must be away from an arc flash in order to not be at risk for Welder's Flash; a welding eye injury that occurs from exposure to intense ultraviolet light.

Tapered polycarbonate face shield // Shown with HGBR – sold separately

- S1150 • 5.0 IR Filter

i For more information about the S1150 see page 94.

Cylinder IR5 Face Shield

ANSI •
Cylinder polycarbonate face shield // Shown with HGBR – sold separately

- S1250 • 5.0 IR Filter

i For more information about the S1250 see page 94.

Capstone® Shield ANSI • CE •

Fully adjustable elastic band // Fits over most prescription glasses // Goggles pass D3: Droplet and Splash Test // Goggles pass D4: Dust Test // Removable vent caps // Goggle combined with removable shield provides full face protection

Lens and Shield | 2 Variations

- GG504TSHIELDIR3 • 3.0 IR Filter H2X AF
- GG504TSHIELDIR5 • 5.0 IR Filter H2X AF

i For more information about the Capstone Shield see page 76.

Only the goggles contain IR dye. The shield is only green tinted.

V2G® ANSI • AS •

Flame resistant foam padding // Vented lens and frame // Interchangeable temples and strap included // Strap and temples feature ratchet adjustment with quick-fit retainer

Black Frame | 2 Variations

- GB1850SFT • 5.0 IR Filter H2X AF
- GB1860SFT • 3.0 IR Filter H2X AF

i For more information about the V2G see page 48.

V2G Readers on page 73.

Emerge® ANSI • CSA •

Soft nosepiece provides comfort for extended use

Black Frame | 2 Variations

- SB7950SF • 5.0 IR Filter
- SB7960SF • 3.0 IR Filter

i For more information about the Emerge see page 70.

Ever-Lite® ANSI •

Soft nosepiece for snug fit // Slim co-injected temples // Lightweight spectacle – 22 gm

Black Frame | 2 Variations

- SB8650SF • 5.0 IR Filter
- SB8660SF • 3.0 IR Filter

i For more information about the Ever-Lite see page 56.

Ever-Lite Readers on page 71.

Venture II® ANSI • CE •

Temples adjust to four different lengths // Rubber nosepiece secures the glass and prevents slipping

Black Frame | 2 Variations

- SB1850SF • 5.0 IR Filter
- SB1860SF • 3.0 IR Filter

i For more information about the Venture II see page 58.

Venture II Readers on page 71.

Integra® ANSI • CE •

Adjustable temples ensure reliable performance

Black Frame | 2 Variations

- SB450SF • 5.0 IR Filter
- SB460SF • 3.0 IR Filter

i For more information about the Integra see page 62.

Onix® Plus ANSI • CE • AS •

Co-injected temples // Adjustable rubber nosepiece // Unique 3-angle adjustable flip lens // Outer lens flips down for applications where IR lenses are needed

Black Frame | 2 Variations

- SB4950STP • Clear with 5.0 IR H2X AF
- SB4960STP • Clear with 3.0 IR H2X AF

i For more information about the Onix Plus see page 61.

OTS® ANSI •

Fits over most prescription glasses // Lightweight nylon temples adjust for length and pitch

Black Temples | 2 Variations

- S3550SFJ • 5.0 IR Filter
- S3560SFJ • 3.0 IR Filter

i For more information about the OTS see page 74.

Ztek® ANSI • CE • CSA •

Integrated nosepiece // Soft non-slip rubber temple tips provide non-binding fit

Lens and Temples | 4 Variations

- S2514S • 1.5 IR Filter
- S2550SF • 5.0 IR Filter
- S2560SF • 3.0 IR Filter
- S25ARCS • Arc – 1.5 IR Filter

i For more information about the Ztek see page 67.

S2514S is designed for peripheral personnel and visitors who are NOT exposed to direct IR radiation.

S25ARCS is great for use under the welding helmet – allowing welder to see work clearly without suffering “welder’s flash burn” from surrounding welders.

Ztek Readers ANSI •

Integrated nosepiece // Soft non-slip rubber temple tips provide non-binding fit

Lens and Temples | 2 Variations

- S2514R15 • 1.5 IR Filter +1.5 Mag
- S2514R20 • 1.5 IR Filter +2.0 Mag

ANSI S3.19

NRR
Noise Reduction Rating (NRR) is an estimated unit of measurement used to determine the amount of sound in decibels (dB) that a hearing device is capable of blocking out when properly worn.

CE EN 352:2002

SNR
Single Number Rating (SNR) is an estimated unit of measurement used to determine the amount of sound in decibels (dB) that a hearing device is capable of blocking out when properly worn. SNR also rates hearing protection by the noise environments in three categories: high-frequency (H), mid-frequency (M), and low-frequency (L).

Metal detectable earplugs are designed for those working in food manufacturing. Almost all food manufacturing facilities use some form of metal detection in order to test outgoing products, ensuring they are free from contaminants. The blue color is an important component of the earplug — it is a popular choice because it contrasts with most food color.

LEARN MORE ABOUT
NEW COOLING
IN THE ADDENDUM

THE HEAT IS ON

Each year an estimated 10 million workers in the U.S will be affected by heat stress.

Source: OSHA Occupational Heat Exposure

THE HOURS MATTER
The most dangerous heat hours are between 11 am–5 pm. Schedule frequent rest breaks to ensure you will not overheat.

DRINK MORE WATER
Drink about 1 cup of water every 15 to 20 minutes to prevent heat related stress or injury. Drink water before becoming thirsty.

SELECTION CHART

KNOW THE SYMPTOMS
Be aware of the signs and symptoms of heat-induced illnesses. Heat causes more deaths than any other weather-related hazards.

THE RIGHT CLOTHING
Wear clothing that is breathable, lightweight, and loose-fitting. Cooling products work as an additional relief from the heat.

ANSI/ISEA COMPLIANT
CNS1 series, CPH160, CSK1 series, and CSKT2 series have been third-party tested and can be worn under ANSI/ISEA compliant Pyramex hard hats (except SL Sleek Shell series).

EVAPORATIVE

CV200 Series TYPE R CLASS 2

ANSI cooling vest // Inner evaporative PVA panels // 2" silver reflective material // Quilted outer shell is made from soft polyester // Zipper front closure // Adjustable waist band // Submerge in cool water before wearing to activate // Reusable – just reactivate // Machine washable

- CV200M Medium adjusts to XL (38" x 48")
- CV200X2 2XL adjusts to 5XL (50" x 64")

CV100 Series NON-RATED

Cooling vest // Inner evaporative PVA panels // Quilted outer shell is made from soft polyester // Zipper front closure // Adjustable waist band // Submerge in cool water before wearing to activate // Reusable – just reactivate // Machine washable

- CV100M Medium adjusts to XL (38" x 48")
- CV100X2 2XL adjusts to 5XL (50" x 64")

CPH160 NON-RATED

Cooling hard hat pad // Evaporative cooling material // Fits on the suspension of cap style and full brim hard hats with hook and loop closures // To activate, soak in cool water // Reusable – just reactivate // Shown with Ridgeline® hard hat – sold separately

- CPH160 Blue

i CPH160 has been third-party tested and can be worn under ANSI/ISEA compliant Pyramex hard hats (except SL Sleek Shell series).

C260 NON-RATED

Cooling towel wrap // Evaporative PVA material // Anti-microbial treated to help prevent mold build-up and unwanted odors // Use as a neck wrap by pulling end of wrap through slit // To activate, simply soak in cool water // Reusable – just reactivate // Machine washable

- C260 Blue (26" x 8.5")

C160 NON-RATED

Cooling towel // Evaporative PVA material // Anti-microbial treated to help prevent mold build-up and unwanted odors // To activate, simply soak in cool water // Reusable – just reactivate // Machine washable

- C160 Blue (26" x 17")

SUN SHADE

HPSHADE Series NON-RATED

Hard hat brim with neck shade // Lightweight material // Fits on the outside of hard hats // Shown with Ridgeline® hard hat – sold separately

- HPSHADE10 White

EYEWEAR FEATURES

BRANDS YOUR CUSTOMERS KNOW

Our longstanding relationships with major distributors, buy groups, and co-ops allow us to offer competitive pricing for the most in-demand brands on the market, including Carhartt, Ducks Unlimited, Venture Gear, and Venture Gear Tactical.

PROGRAMS CUSTOMIZED FOR YOU

Pyramex strives to bolster our service through meeting our customers face to face at trade shows so we can understand what helps your business amplify its sales. We customize our proven programs to present you with researched solutions that help maximize your keystone margins while making multiple turns on inventory.

MERCHANDISING SOLUTIONS

We offer customized planograms and retail-ready packaging, removing an extra step of work for you. Our branded displays maximize floor space, so all you have to decide is what products best serve your business.
